10011/20011 Principles of Micro Economics
(Various Times) Doran, Flannery, Hungerman, Lieber, Miller, Mogavero, Van Leemput, Zenebe Gebre
An introduction to economics with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, foreign trade and the international economy.

10020/20020 Principles of Macro Economics
(Various Times) Brooks, Fuerst
A continuation of introduction to economics with emphasis on the measurement of national economic performance, alternative explanations of short-run economic fluctuations and long-run economic growth, money and credit, fiscal and monetary policy.

13181 Soc. Science University Seminar (Freshman Only)
TR 12:30-1:45 Leahy
Economics sections will deal with different aspects of economic analysis and policy issues. The focus will be on understanding how economists think about theoretical issues and how they apply their analytical tools to real-world economic problems and policies. No background in economics is assumed.

30010 Intermediate Economic Theory – Micro
MW 11:00-12:15, 12:30-1:45 Gresik
An examination of the language and analytical tools of microeconomics emphasizing the functional relationship between the factor and product markets and resource allocation. Prerequisite: (ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011) and (MATH 10260 or MATH 10560 or MATH 10860)

30020 Intermediate Economic Theory - Macro
TR 2:00-3:15, 3:30-4:45, Lugauer
An intensive examination of macroeconomics with particular reference to the determination of national income, employment, and the general price level. Prereq: (ECON 10020 or ECON 20020) and (MATH 10260 or MATH 10560 or MATH 10860)

30150 Intro to Econ & Catholic Thought
MW 12:30-1:45 Kaboski
This course will discuss the relationship between economics and Catholic social teaching. We will learn about key principles in Catholic social thought, read key Papal encyclicals and other writings. We will then discuss key economic concepts and empirical facts known from the field of economics, and how these relate to Catholic social teaching. Finally, we will apply these ideas to discussions on labor, capital, finance, the environment, globalization, and development. Prereqs: ECON 10010 or ECON 10020 or ECON 20010 or ECON 20020

30300 Empirical Research in Economic Stata
R 3:30-4:20, Ng
This course will equip students with substantial knowledge of Stata so that they can use it for econometric analyses in their research projects, such as senior honors thesis. Using real datasets, students will learn how to use Stata to read and manipulate data, and to produce reliable results. The course will therefore focus on the practical aspect of data analysis rather than econometric theory. The course will also highlight many common pitfalls that beginning researchers often fall into. By the end of the course, students should feel sufficiently competent with Stata to independently work on any dataset. Prerequisites: ECON 30331 Econometrics
30330 Statistics
MW 12:30-1:45, 2:00-3:15 Lee, MWF 10:30-11:20 Wagner
This course seeks to introduce the student to the principles of probability and statistical theory appropriate for the study of economics. The emphasis of the course will be on hypothesis testing and regression analysis.

30331 Econometrics
MW 2:00-3:15, 3:30-4:45 Buckles
Provides students with an understanding of when and how to use basic econometric methods in their work as an economists, including the ability to recognize which econometric technique is appropriate in a given situation as well as what explicit and implicit assumptions are being made using the method. Topics covered include estimation and hypothesis testing using basic regression analysis, problems with basic regression analysis, alternative econometric methods, limited dependent variables, and simultaneous equation models. Prereq: ECON 30330 or BAMG 20100 or BAMG 230

33420 Employee Relations Law (writing intensive)
TR 9:30-10:45, Leahy
This course is the seminar version of ECON 30420. A study of the development of common statutory law with reference to discrimination in the United States on the basis of race, creed, color, national origin, and disability, and giving emphasis to the case method.

40050 Game Theory
MW 3:30-4:45 Johnson
The objective of this course is to help students develop a good understanding of the basic concepts in game theory and learn how to employ these concepts to better understand strategic interactions. Topics covered will include normal form games, extensive form games, pure and mixed strategies, Nash Equilibrium, subgame perfect equilibrium, repeated games, and introduction to games of incomplete information. Selected applications will include competition and collusion in oligopoly, entry deterrence, political competition and rent seeking, social norms and strategic interaction. Prereq: (MATH 10250 or 10550) and (ECON 30010 or FIN 30210)

40580 The Economics of Industrial Organization
MW 2:00-3:15, 3:30-4:45 Thurk
This course focuses on the strategic behavior of firms in imperfectly competitive markets. The course will cover the acquisition and use of market power by firms, strategic interactions amongst firms, and the role/effects of government competition policy. There will be a strong emphasis on applying the theoretical tools developed in class to assess markets and issues observed in the world. Prereqs: ECON 30010 or FIN 30210

40710 International Trade
MW 2:00-3:15, 3:30-4:45 Gervais
This is a course on international microeconomics. Its primary goal is to develop analytical tools to help us understand the causes and consequences of international trade flows. The course covers models of comparative advantage, which shows that countries engage in international trade to exploits differences in technology and resources, as well as new trade theories that emphasize increasing returns to scale in production. A substantial amount of time will also be devoted to studying the impact of trade policies, such as tariffs, quotas, export subsidies, and trade agreements on the economy. Prereq ECON 30010 or FIN 30210
40800 Development Economic  
MW 8:00-9:15 Donovan  
The current problems of Third World countries are analyzed in a historical context, with attention given to competing theoretical explanations and policy prescriptions. The course will combine the study of the experiences of Latin American, African, and Asian countries with the use of the analytical tools of economics.

43110 History of Economic Thought (writing intensive)  
MW 2:00-3:15 Mirowski  
This course is the seminar version of ECON 40110. The course intends to ask how it is that we have arrived at this curious configuration of doctrines now called "economics"; and importantly, how differing modes of historical discourse tend to ratify us in our prejudices about our own possible involvement in this project. The course will begin in the 18th century with the rise of a self-conscious discipline, and take us through the stabilization of the modern orthodoxy in WWII. Effort will be made to discuss the shifting relationship of economics to the other sciences, natural and social. A basic knowledge of economics (including introductory economics and preferably intermediate economics) will be presumed.

43565 Economics of Natural Resources (writing intensive)  
MW 11:00-12:15 Jensen  
Treatises on "optimal" harvesting of trees and other natural resources date back at least to John Evelyn (1620 -1706). This course examines a wide variety of situations in which the socially optimal "economic use" of a natural resource involves its preservation. Emphasis is placed on: using the logic of economics to demonstrate when preservation of a natural resource is preferable to its reduction or destruction; using examples to clarify these arguments; and broadening the definition of "natural resources" to include some nontraditional resources.

43750 Economics of China (writing intensive)  
MW 4:30-5:45 Mark  
The course will cover aspects of China's economy (international, macro, labor market issues, demographics, migration, and others) since economic reforms were implemented in 1978. Prereqs: ECON 30010, 30020, and 30331

43961 Senior Honors Program  
TR 11:00-12:15 Sullivan  
This seminar provides instructional support for economics majors completing the undergraduate economics honors program. It also provides a venue where honors program students present progress reports on their senior honors essays to their peers at regular intervals. The seminar is graded on a satisfactory/unsatisfactory basis and may be taken twice.
