10011/20011 Principles of Micro Economics
(Various Times) Deonanan, Doran, Jones, Mogavero, Pant, Rath, Roelands
An introduction to economics with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, foreign trade and the international economy.

10020/20020 Principles of Macro Economics
TR 2:00-3:15, 3:30-4:45 Alder, TR 11:00-12:15 Rastovski, MWF 8:30-9:20 Yepez
A continuation of introduction to economics with emphasis on the measurement of national economic performance, alternative explanations of short-run economic fluctuations and long-run economic growth, money and credit, fiscal and monetary policy.

13181 Soc. Science University Seminar (Freshman Only)
TR 12:30-1:45 Leahy
Economics sections will deal with different aspects of economic analysis and policy issues. The focus will be on understanding how economists think about theoretical issues and how they apply their analytical tools to real-world economic problems and policies. No background in economics is assumed.

30010 Intermediate Economic Theory – Micro
MW 11:45-1:00, Sullivan
An examination of the language and analytical tools of microeconomics emphasizing the functional relationship between the factor and product markets and resource allocation.
Prerequisite: (ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011) and (MATH 10260 or MATH 10560 or MATH 10860)

30020 Intermediate Economic Theory - Macro
TR 11:00-12:15, 2:00-3:15 Lugauer
An intensive examination of macroeconomics with particular reference to the determination of national income, employment, and the general price level. Prereq: (ECON 10020 or ECON 20020) and (MATH 10260 or MATH 10560 or MATH 10860)

30150 Intro to Econ & Catholic Thought
MW 1:30-2:45 Kaboski
This course will discuss the relationship between economics and Catholic social teaching. We will learn about key principles in Catholic social thought, read key Papal encyclicals and other writings. We will then discuss key economic concepts and empirical facts known from the field of economics, and how these relate to Catholic social teaching. Finally, we will apply these ideas to discussions on labor, capital, finance, the environment, globalization, and development. Prereqs: ECON 10010 or ECON 10020 or ECON 20010 or ECON 20020
30330 Statistics
MW 8:00-9:15 Garin, MW 1:30-2:45 Munnich
This course seeks to introduce the student to the principles of probability and statistical theory appropriate for the study of economics. The emphasis of the course will be on hypothesis testing and regression analysis.

30331 Econometrics
MW 8:00-9:15 Evans, MW 1:30-2:45 Lee
Provides students with an understanding of when and how to use basic econometric methods in their work as an economists, including the ability to recognize which econometric technique is appropriate in a given situation as well as what explicit and implicit assumptions are being made using the method. Topics covered include estimation and hypothesis testing using basic regression analysis, problems with basic regression analysis, alternative econometric methods, limited dependent variables, and simultaneous equation models. Prereq: (ECON 30330 or ECON 303) or (BAMG 20100 or BAMG 230)

33290 Political Economy of Financial Crises (writing intensive)
TR 12:30-1:45 Wolfson
A discussion seminar. This course will examine the recent experience of the US and global economies with financial crises, especially the most recent crisis involving housing speculation, financial derivatives, and banking. The course will use the tools of political economy to address this question, in particular theories and perspectives drawn from the writings of Karl Marx, John Maynard Keynes, Karl Polanyi, and Thorstein Veblen, among others. It will examine historical and structural changes in the financial system over the past 30 years, and how these changes have affected the behavior of financial crises. In addressing prospects for change, the course will examine policies, institutions, and the basic structures of power and influence in the economy.

40050 Game Theory
MW 3:00-4:15, 4:30-5:45 Johnson
The objective of this course is to help students develop a good understanding of the basic concepts in game theory and learn how to employ these concepts to better understand strategic interactions. Topics covered will include normal form games, extensive form games, pure and mixed strategies, Nash Equilibrium, subgame perfect equilibrium, repeated games, and introduction to games of incomplete information. Selected applications will include competition and collusion in oligopoly, entry deterrence, political competition and rent seeking, social norms and strategic interaction.

40580 The Economics of Industrial Organization
MW 1:30-2:45 Thurk
This course focuses on the strategic behavior of firms in imperfectly competitive markets. The course will cover the acquisition and use of market power by firms, strategic interactions amongst firms, and the role/effects of government competition policy. There will be a strong emphasis on applying the theoretical tools developed in class to assess markets and issues observed in the world.
40710 International Trade
MW 3:00-4:15 Gervais
This is a course on international microeconomics. Its primary goal is to develop analytical tools to help us to understand the causes and consequences of international trade flows. The course covers models of comparative advantage, which shows that countries engage in international trade to exploit differences in technology and resources, as well as new trade theories that emphasize increasing returns to scale in production. A substantial amount of time will also be devoted to studying the impact of trade policies, such as tariffs, quotas, export subsidies, and trade agreements on the economy. Prereq Econ 30010 or FIN 30210

43410 Labor Law (writing intensive)
TR 9:30-10:45 Leahy
This course is the seminar version of ECON 30410. A study of the development of common and statutory law with reference to industrial relations in the United States with emphasis on the case method.

43530 Environmental Economics (writing intensive)
TR 9:30-10:45 Lipscomb
This course is the seminar version of ECON 30530. An analysis of the welfare economics of environmental problems, emphasizing market failures due to negative environmental externalities. Air, water, and land pollution are classic examples of these externalities, which occur when third parties bear costs resulting from the transactions of the two primary market participants. The theory and practice of environmental policy to promote efficiency at the US local, state, and federal levels and in other countries is explored. International problems such as transboundary pollution and global warming are also studied.

43961 Senior Honors Program
T 3:30-4:30 Jensen
This seminar provides instructional support for economics majors completing the undergraduate economics honors program. It also provides a venue where honors program students present progress reports on their senior honors essays to their peers at regular intervals. The seminar is graded on a satisfactory/unsatisfactory basis and may be taken twice.
