**10011/20011 Principles of Micro Economics**
(Various Times) Flannery, Hungerman, Mogavero, Wolff, Yung
An introduction to economics with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, foreign trade and the international economy.

**10020/20020 Principles of Macro Economics**
(Various Times) Brooks, Fuerst, Rastovski
A continuation of introduction to economics with emphasis on the measurement of national economic performance, alternative explanations of short-run economic fluctuations and long-run economic growth, money and credit, fiscal and monetary policy.

**13181 Soc. Science University Seminar (Freshman Only)**
TR 12:30-1:45 Leahy
Economics sections will deal with different aspects of economic analysis and policy issues. The focus will be on understanding how economists think about theoretical issues and how they apply their analytical tools to real-world economic problems and policies. No background in economics is assumed.

**30010 Intermediate Economic Theory – Micro**
MW 3:00-4:15 Gresik, TR 11:00-12:15 Sullivan
An examination of the language and analytical tools of microeconomics emphasizing the functional relationship between the factor and product markets and resource allocation.
Prerequisite: (ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011) and (MATH 10260 or MATH 10560 or MATH 10860)

**30020 Intermediate Economic Theory - Macro**
TR 9:30-10:45, 11:00-12:15 Pries
An intensive examination of macroeconomics with particular reference to the determination of national income, employment, and the general price level. Prereq: (ECON 10020 or ECON 20020) and (MATH 10260 or MATH 10560 or MATH 10860)

**30330 Statistics**
TR 11:00-12:15 Berg, MW 3:00-4:15 Lee, TR 9:30-10:45 Noble
This course seeks to introduce the student to the principles of probability and statistical theory appropriate for the study of economics. The emphasis of the course will be on hypothesis testing and regression analysis.

**30331 Econometrics**
MW 11:45-1:00 Hagemann, MW 1:30-2:45 Lee
Provides students with an understanding of when and how to use basic econometric methods in their work as an economists, including the ability to recognize which econometric technique is appropriate in a given situation as well as what explicit and implicit assumptions are being made using the method. Topics covered include estimation and hypothesis testing using basic regression analysis, problems with basic regression analysis, alternative econometric methods,
limited dependent variables, and simultaneous equation models. Prereq: ECON 30330 or BAMG 20100 or BAMG 230

**33400 Labor Economics (writing intensive)**
MW 11:45-1:00, 1:30-2:45 Wozniak
A survey course covering the economics of the labor market, the labor force, and the relationship between firms and employees. Topics include employment and unemployment; the distribution of wages and income; education; discrimination; anti-poverty policy; immigration; and international comparisons of labor systems. Prereq: 10011, or 10010 or 20010, or 20011.

**40050 Game Theory**
TR 11:45-1:00 Johnson, TR 3:30-4:45 Rath
The objective of this course is to help students develop a good understanding of the basic concepts in game theory and learn how to employ these concepts to better understand strategic interactions. Topics covered will include normal form games, extensive form games, pure and mixed strategies, Nash Equilibrium, subgame perfect equilibrium, repeated games, and introduction to games of incomplete information. Selected applications will include competition and collusion in oligopoly, entry deterrence, political competition and rent seeking, social norms and strategic interaction. Prereq: (MATH 10250 or 10550) and (ECON 30010 or FIN 30210)

**40580 The Economics of Industrial Organization**
TR 2:00-3:15, 3:30-4:45 Thurk
This course focuses on the strategic behavior of firms in imperfectly competitive markets. The course will cover the acquisition and use of market power by firms, strategic interactions amongst firms, and the role/ effects of government competition policy. There will be a strong emphasis on applying the theoretical tools developed in class to assess markets and issues observed in the world. Prereqs: ECON 30010 or FIN 30210

**40710 International Trade**
MW 1:30-2:45, 3:00-4:15 Gervais
This is a course on international microeconomics. Its primary goal is to develop analytical tools to help us to understand the causes and consequences of international trade flows. The course covers models of comparative advantage, which shows that countries engage in international trade to exploits differences in technology and resources, as well as new trade theories that emphasize increasing returns to scale in production. A substantial amount of time will also be devoted to studying the impact of trade policies, such as tariffs, quotas, export subsidies, and trade agreements on the economy. Prereq ECON 30010 or FIN 30210

**43410 Labor Law (writing intensive)**
TR 9:30-10:45 Leahy
This course is the seminar version of ECON 30410. A study of the development of common and statutory law with reference to industrial relations in the United States with emphasis on the case method.
43550 Economics of the Family (writing intensive)
TR  2:00-3:15  Buckles
This course will use economic theory and empirical economic research to study the family. Topics will include household decision making; the determinants of marriage and fertility; how marriage, fertility, and family structure are related to other outcomes; and public policies that affect the family and family formation. Students will learn to read and evaluate empirical economic research. Prereq: ECON 30331

43565 Health Economics (writing intensive)
MW 8:00-9:15  Evans
The course is designed to illustrate how economists analyze topics related to the production of health and the delivery of health care in the United States. Topics covered include the social and economic determinants of health, the economic control of unhealthy behavior, economic consequences of the AIDS epidemic, using economics to explain the rise of obesity, economic models of insurance, the problems of moral hazard and adverse selection, the economic impact of employer-provided health insurance. Medicare and Medicaid, the problem of the uninsured, medical technology and the pharmaceutical industry, the malpractice system, and the rise of managed care. Readings for the class will come from a required textbook and academic reading downloadable from the class web page. Class assignments will include problem sets, exams and short policy memos.

43750 Economics of China (writing intensive)
MW 4:30-5:45  Mark
The course will cover aspects of China’s economy (international, macro, labor market issues, demographics, migration, and others) since economic reforms were implemented in 1978. Prereqs: ECON 30010, 30020, and 30331

43961 Senior Honors Program
T 3:30-4:30  Jensen
This seminar provides instructional support for economics majors completing the undergraduate economics honors program. It also provides a venue where honors program students present progress reports on their senior honors essays to their peers at regular intervals. The seminar is graded on a satisfactory/unsatisfactory basis and may be taken twice.
